R3Water Newsletter Covers Urban Wastewater Reuse Trials

R3Water Newsletter from May 2016 summarizes reuse, recovery and efficiency demos for urban wastewater treatment, reported by iAgua on 27 May 2016. The issue covers demonstration plants in 3 countries, listed by CORDIS in its fact sheet updated 20 April 2022. The underlying project ran from 1 January 2014 to 30 June 2017, stated by CORDIS on 20 April 2022. Readers tracking R3Water Workshop site visits can place this issue in that event sequence.

What does the R3Water Newsletter say about reuse demos?

R3Water Newsletter highlights monitoring and disinfection control for reclaimed water, developed by Teqma and noted on 12 November 2026. The system adjusts disinfection automatically to secure microbiological quality, described by Teqma on 12 November 2026. The approach supports water reuse under grant 619093, recorded by CORDIS on 20 April 2022.

Where did the R3Water Newsletter place its trials?

R3Water Newsletter places trials in Belgium, Spain and Sweden, listed by CORDIS on 20 April 2022. The three sites test resource-efficient treatment, advanced control and management measures, summarized by CORDIS on 20 April 2022. Coordination sits with IVL Swedish Environmental Research Institute, named by CORDIS on 20 April 2022. Context on the Water in the circular economy final conference helps readers follow later results.

How was the R3Water Newsletter project funded and run?

R3Water Newsletter project spent 7737542.30 euros with 5282867 euros EU funding, reported by CORDIS on 20 April 2022. The work ran 42 months from January 2014, stated by Teqma on 12 November 2026. The budget stood at 7.8 million euros across 12 partners, stated by Teqma on 12 November 2026. LEQUIA held 272800 euros under reference GA 619093, recorded by Lequia on 12 November 2026. Broader updates appear in Industry News.

Focus | Demo element

Water reuse | Monitoring plus automatic disinfection adjustment
Valuables recovery | Nutrient and energy recovery from incoming water
Resource efficiency | Advanced control and management in existing plants

R3Water Newsletter Common Questions

What project does the R3Water Newsletter update?

R3Water Newsletter updates grant 619093 for urban wastewater reuse, recovery and efficiency, recorded by CORDIS on 20 April 2022. The project ran from 1 January 2014 to 30 June 2017, stated by CORDIS on 20 April 2022.

Where were R3Water Newsletter demo sites located?

R3Water Newsletter demo sites were in Belgium, Spain and Sweden, listed by CORDIS on 20 April 2022. The sites tested reuse and recovery solutions, summarized by CORDIS on 20 April 2022.

How was the R3Water Newsletter work funded?

R3Water Newsletter work used 5282867 euros EU funding of 7737542.30 euros total, reported by CORDIS on 20 April 2022. Teqma cites a 7.8 million euro budget over 42 months, noted on 12 November 2026.
